ADMINISTRATIVE ISSUES:

Sheldon Schall called the meeting to order at 9:05 a.m. Introductions were made and the last progress report from 12/5/02 was approved.

Sheldon explained that the appendix to the new code would contain copies of the forms along with other useful information directly related to the application of the code. He also stated that he is intending to develop a “compendium” style section in the appendix to explain intent, give examples, etc.

REVIEW OF CODE DRAFT:

The remainder of the meeting was spent discussing subchapters I-IV and VII-VIII of the code draft. These subchapters cover, respectively: Purpose, application and definitions, Administration and enforcement, Adopted standards and general requirements, Specific tank storage applications, Fuel dispensing, and Financial responsibility. Subchapters V and VI, covering general aboveground and general underground tank storage, will be the primary topic of the next meeting.

The discussion proceeded by taking each page individually and asking for questions and comments. These comments were noted and will be discussed internally and incorporated into the public hearing draft as appropriate.

NEXT MEETING: There is one more meeting of the full Comm 10 Committee scheduled for **Thursday, June 12, 2003**. This meeting is anticipated to be the last meeting prior to holding public hearings on the full draft.
